

**1. PROPERTIES AND CHARACTERISTICS:**

Colourless, odourless, viscous liquid.

<b>Concentration</b>	50 % p/p
<b>Sodium Carbonate (Na<sub>2</sub>CO<sub>3</sub>)</b>	0,5 % p/p (max.)
<b>Sodium Chloride (NaCl)</b>	0,01 % p/p (max.)
<b>Iron (Fe)</b>	1 ppm (max.)
<b>Nickel (Ni)</b>	0,01 ppm (max.)

It is a strong base and very corrosive.

Chemical formula: NaOH.

Also called liquid Caustic Soda, Caustic Mineral Alkali, Soda Lye.

**2. COMPOSITION:**

50 % Sodium Hydroxide.

**3. APPLICATIONS:**

- Reagent
- pH regulating agent
- Catalyst
- Ion exchange resin generating agent
- Etching agent
- Cleaning agent

**4. SAFETY:**

When handling chemicals it is essential to take the measures indicated in the safety data sheet.

**5. SUPPLIED:**

In 24 tonne tank-container.

In 1000 kg IBCs.
